Skills

Programming languages

PHP	SQL
Python	HCL
Javascript/TS	HTML/CSS
GO	Bash

Other tools

AWS	Redshift
Pyspark	Airflow
Nifi	Docker
Terraform	Postgres
aws glue	Nodejs
Git	Linux
Circleci	Datadog

Soft Skills

- Logical mindset
- Hard working
- Empathic
- Open minded

Interests

- Scientific reading
- Language learning
- Hiking
- Music
- Dancing

Bernat Ferrer

Data Engineer - Software Engineer

Professional experience

Data Engineer at Mad Collective

10/2023 - Present Barcelona

- Design, creation and maintenance of data pipelines, processing millions of daily events.
- Management of a data warehouse and a data lake enabling advanced analytics for product teams.
- Infrastructure development using terraform and CI/CD pipeline design with circleci.
- Implemented testing, alerting, and observability solutions to ensure data consistency and transparency.
- Migrated the AWS Redshift cluster to the new generation of nodes with zero downtime.
- Migrated monitors and alerts from Datadog to Grafana ensuring our observability remained intact

Software Engineer at Mad Collective

2023 Barcelona

- Developed and maintained a billing-gateway app, integrating our products with payment processors.
- Optimized heavy workload use-cases by implementing caching solutions and query refactoring, reducing load time by up to 50 %.

Software Engineer at Estimote/Meetaitech

04/2021 - 12/2022 Barcelona

- Development of a workflow automation tool for hospital employee using hexagonal architecture.
- Implementation of a notification and alerting system using web sockets.
- Designed and implemented an algorithm to unify event identifiers across Outlook and Google Calendar.
- Improved API performance by optimizing database queries and reducing call overhead.

Backend developer at Bekodo

03/2021 - 04/2021 Barcelona

- Developed an app to process and load data from spreadsheets to the cloud, helping small businesses transition to e-commerce.

Data analyst at M-net

09/2018 - 10/2019 Munich

- Analyzed revenue data to identify optimization opportunities and minimize losses.
- Detection and assessment of internal and external fraud.

Physics Researcher at the USM

02/2018 - 12/2019 Munich

- Developed an interface for the visualization of data coming from astrophysical simulations using python.

Education | Certificates

AWS Certified Cloud Practitioner

02/2023

Software Development Master at Assembler Institute

06/2020 - 02/2021 Barcelona

Astrophysics Master at LMU

09/2017 - 09/2019 Munich

Physics degree at UAB

09/2012 - 06/2017 Barcelona

Additionally

- Freelance tech consulting services for tema-litoclean group. present
- Development of a product stock manager for Celler de l'Era. 2022
- Creation and maintenance of a vs-code theme. 2021
- Development of a game using vue and typescript. 2021
- Development of a language learning app in Kotlin. 2020
- Internship at the European southern observatory. 2019 Munich
